

# Loaning items

Loaning a toy is the most basic function you will need to perform using this software. All loans are linked to a member's name.

Begin typing the member's name in the search bar in the top left of your screen.

\*Note: A toy may not be available for loan because it has not been previously returned correctly within the toy library system. If this is the case you will get an error message on your screen stating that the toy is already 'on loan' as seen in the following:

Error Message: FEBER GUS CATERPILLAR

A029: Feber Gus Caterpillar has the following issues preventing it from being loaned:

- Currently on loan to Cara Warner

[Override and loan anyway?](#)

To resolve this issue click the 'Override and loan anyway' button and the toy will be correctly returned in the system and instantly loaned out to the member. You can then confirm the success of the loan as shown in the images above.
